

# How do the Plans Compare?

## Travel Performance

Corridor Level of Service

Vehicle Hours of Congestion

Percent of Arterial Lane Miles Congested

## Air Quality

Carbon Monoxide

Volatile Organic Compounds

Nitrogen Oxides

## Facility Performance

Pedestrian

Bicycle

Transit

## Citywide Mobility Index\*

Alternative Modes as Percent of Total Trips

\* Composite of pedestrian, bicycle, transit and roadway performance.

## What Does This All Mean?

Through strategic action we can help reduce the trend toward more congestion and increase mobility and travel choices.
